EXPERIENCE

Dynamic Signal iOS Intern   Sept 2016 - Present | San Francisco Bay Area
Objective-C, Swift

- Implemented @mention to tag a user in a comment, improving user engagement by 10%
- Led the development for landscape UI on the VoiceStorm app to ensure consistency across products
- Migrated over 15% of the codebase from Objective-C to Swift

Social Petals Freelance Developer   May - Aug, 2016 | Remote
Swift, AFNetworking, Auto Layout, Core Data

- Worked extensively with clients to prototype a full stack iOS social fundraiser app
- Built a networking manager to cache JSON objects to relieve stress on the REST client

Amaya Software Mobile Developer   Jan - April 2016 | Toronto
Objective-C, Objective-C++, WatchKit

- Collaborated with designers to develop an iOS watch app for the PokerDuel app
- Developed features to accept and decline friends, check stats, and notify users through the Apple Watch

Loblaw Digital QA Intern   May - Aug 2015 | Toronto
Selenium, Java, Git

- Built automated tests in Selenium for beautyboutique.ca which increased code coverage from 75% to over 90%

PROJECTS   dujason.com/projects

Sepr Swift, MapKit, AFNetworking, Firebase

- Independently developed an iOS app that displays real estate information for home owners in Ontario
- Published on the App Store and received over 4,000 installations to date with 300 active users

Ultimate Tic-Tac-Toe Swift, Auto Layout

- Developed an iOS app that lets users play Tic-Tac-Toe across ten boards with friends
- Published on the App Store and received over 1,000 installations
- Created constraint based views using Auto Layout for all devices
